

Fridge Magnets

Design and make a magnet for your fridge.

Now there'll be no excuses next time you come home from school with a drawing or papers to display. Simply grab your fridge magnet and put them up for all to see. Your drawings will soon be the pride of the kitchen!

Equipment

1. The lid from a jam jar.
2. Some thin card.
3. A variety of materials to use as decorations (such as coloured paper, photographs, fabric, ribbons, beads, buttons and glitter).
4. A small flat magnet.
5. Some coloured pencils or crayons.
6. A pencil.
7. Some paper glue (such as Copydex).

Safety Stuff

Check with an adult before you begin, just in case you need their help.

Using items such as scissors can be dangerous, so be very careful when you use them, and make sure that you never leave them open or lying around where smaller children can reach them.

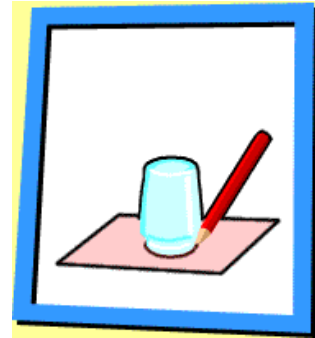

Before starting any of the projects, cover the work surface with some newspaper or an old cloth. Make sure you are wearing an apron or some old clothes. Gather together all the items you'll need before you begin. Most things will probably be found by simply hunting around the house, but remember to check with an adult before you take anything!

Steps

Step One

Place the jam jar lid on the piece of card and draw around it with a pencil. Then cut out the circle with a pair of scissors.

Next decorate the piece of card. Colour it in and add any extra items such as glitter, ribbons or material. Why not use the circular shape as a theme for your design? For example, you could make a face, a flower, or a large sun.

Step Two

Dab a bit of glue on the back of the card and push it inside the lid of the jam jar.

Glue the magnet onto the back of the jam jar lid. Your fridge magnet is ready to be stuck on the fridge.
